Medical Records & Health Information Technician Training

This course will introduce the basic functions of the electronic medical record and health information, its’ benefit to us as healthcare workers and the benefit to physicians and patients. The course will introduce the basic technological requirement for an electronic medical record and health information system and discuss some of the available options. The course will also introduce the best practices for transition from a paper based record to an electronic medical record. Students will also learn the current health information technology standards as well as the rules and regulations that govern electronic medical record and health information software.

Comprehensive 100-hour Training Course

- 80 hours of classroom
- 20 hours simulation lab

Certification

The Medical Records and Health Information Technician Program prepares for ONE certification exam:

- Certified Electronic Health Record Specialist exam (CEHRS) offered by the National Healthcareer Association (NHA)
