MassBay Community College

STEM

Middle School Summer Program

STEM SUMMER EXPERIENCE FOR RISING 7TH & 8TH GRADERS

Date: July 11-22, 2016
Time: 9:00am - 3:30pm
Location: MassBay Community College
Cost: $350 for 2 weeks

STEM Summer allows students to explore a common theme through Chemistry, Biology, Mathematics, Physics, Computer Science and Engineering. The morning is spent in a hands-on academic setting where students are taught by MassBay professors. In the afternoon, students work in groups to create a three-dimensional representation of what they learned in the morning. Past themes have been, “Space”, where students were challenged to build their own planet, and “Cities”, where students designed their own city to scale. Activities are designed to be fun, explorative and something students would unlikely encounter in a traditional school setting.
