

Global Smile Foundation(GSF)

Making Miracles Happen

By Dr. Usama Hamdan

The Global Smile Foundation (GSF) exists to bring first-class surgical repair to patients throughout the developing world who suffer from congenital facial deformities. The vast majority of unaddressed need we see in this population is children with cleft lips and palates. A Devastating condition because access to surgical care is rare in the countries GSF serves. The simple procedure to repair cleft is difficult to find, yet the consequences of untreated cleft lip or palate are devastating. GSF is proud to work with our partner sites in Latin America, Africa, the Middle East, and the Indian Subcontinent.

Organizer: Multicultural Mentoring Program (MMP)

Date: Wednesday 11/7/2018

Time: 12:00-1:00pm

Location: Wellesley Hills • Library Atrium
